From last 25 years I am successfully doing Astrology and spiritual work. Astrology is the study of positions and aspect of celestial bodies in the belief that they have an influence on the course of natural earthly occurence and human affairs. Its a vast subject .Each Zodaic sign belongs to four different elements:-Fire,Air,Earth and Water. Fire is a positive element; this element focuses on changing energy from on form to another .Air is also a positive element that is associated with the spiritual part of life. Earth on the other hand is a negative element that is said and approves of people on earth .The last element is water this is to a negative element that tends to be mysterious. Astrologers say they can predict your life through this sign but often you can be very similar to other zodiac signs. Astrologers say that the best way to explain zodiac signs is to 'imagine that your divine spirit is imprisoned in an earthly form, much like animals in a cage '. There is lot to say but I have to end it here .Atlast even today, Astrology is a Interesting Career not only for youngsters but also to other people from any age group. Unfortunately; the research is still in the development stages. This reason could be beneficial to all of us someday.

But really thanks to all my family and friends in all my journey of my life .Lots of near one dear one people are their .I cant express my words. Thanks to everyone from bottom of my heart I am here today due to help of them for supporting me always in all way of my beautiful life.....
