OBJECTIVE

I am a Consultant Dental Surgeon and Implantologist born in Haryana and studied and brought up in Mumbai , currently practicing in rural areas of Maharashtra state , called Degaon , a small village , where we are counselling at om dental , Satara, Free of cost to help people quit tobacco and tobacco related habits and help them live a better, fulfilling, healthy and longer life. People from diverse cultural backgrounds and all strata of society with tobacco addiction in any form, be it smokeless Tobacco, gutkha, mishri , raw tobacco or smoking our work continues.. We strive to bring about a positive change in society and help India become a tobacco free nation Tobacco chewing is very common in rural areas of India where smokeless tobacco and it's various forms The number of people with smokeless tobacco chewing and their addiction to nicotine is large in the remote village of India , where we are currently working to spread awareness and help people quit. Tobacco which is burnt and then ground in to fine dry powder is called as mishri , is commonly rubbed or kept under the cheek for hours by most of the women in rural areas of Maharashtra state. The international Agency for research on cancer classified it as a cause of mouth, esophageal and pancreatic cancer. Tobacco in any form is addictive due to

SKILLS

PROJECTS

Dr Aishwarya More has been a topper in operative dentistry. Topper in conservative dentistry and endodontics in her final year and Has excelled in sports , represented her School (Cardinal Gracious Convent School , Bandra , Mumbai) at several events and been sports captain throughout. She has been a meritorious student in her school life and Has done exemplary work in the field of tobacco de-addiction in rural areas of Maharashtra state , (inspite of having various opportunities to settle in the US, UK and metro-politian cities in India , chose to live in remote rural area of Maharashtra State with the aim of serving the poor and needy in the villages). She is awarded the Woman Excellence Award for excellence in Health and medical sector by WEAA , Pune. She is an author and regular writer of her blogs on social media. She has given various lectures on oral cancer awareness and tobacco de-addiction. She has conducted free awareness camps in schools for mentally challenged children , treated special children free of cost. The "No tobacco initiative" project started by her at om dental faced lot of struggles and challenges at the beginning as rural people with tobacco addiction, be it raw tobacco, gutkha, mishri, mawa, bidi, cigarettes were not easy to give up on their years of addiction that easily, this project has now earned great accolades after years of hardwork and determination. It has created a revolution in the neglected remote rural areas, this initiative work has achieved amazing reviews on social media. In short span it was able to change lives of 100's of patients. Her work on tobacco related initiative has brought allocades from various disciplines of society. Also holds Record of achievement by WHO, World Health Organisation in Emerging respiratory viruses, including COVID-19:methods of detection , prevention, response and control as on 28th April 2020. Certified in Antimicrobial Stewardship:A competency based Approach. Holds Record of Achievement in e-PROTECT Respiratory Infections(EN). She has added value and contributed to the society by organizing free online sessions, whatsapp class to promote 'no tobacco' and helping people live longer and healthier life in the covid times.
